

ANTONY GORMLEY

SEAN KELLY EXHIBITION EXTENDED

CONSTRUCT is extended until 29 July 2016.

In the main gallery are five new monumental works from Gormley's recent 'Big Beamer' series. These previously unexhibited works deconstruct and reassemble the interior volume of the body through interlocking steel beams that run in all three axes. Created at one-and-a-half-times life-size, they represent a body in five unstable moments of rest, from crouching to fully erect. In spite of their grand scale, the works remain remarkably playful.
